**Biology**

Unit **F215**: Control, Genomes and Environment

Advanced GCE

**Mark Scheme for June 2014**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

© OCR 2014

These are the annotations, (including abbreviations), including those used in scoris, which are used when marking

Annotation	Meaning of annotation
	Blank Page – this annotation must be used on all blank pages within an answer booklet (structured or unstructured) and on each page of an additional object where there is no candidate response.
	Tick
	Cross
	Unclear
	Benefit of doubt
	Effective evaluation
	Level 1
	Level 2
	Level 3
	Level 4
	Not answered question
	Own figure rule
	Noted but no credit given
	Too vague
	Omission

Question			Expected Answer	Mark	Additional Guidance
1	(a)	(i)	<p><i>discontinuous</i> gender / male and female / eye colour ;</p> <p><i>continuous</i> size / length / mass ;</p>	2	<p><b>Mark the first answer on each prompt line.</b> If an additional answer is given that is incorrect or contradicts the correct answer, then = 0 marks</p> <p><b>Note:</b> Suggestions must relate to <b>visible</b> characteristics of the <b>frogs</b>,</p> <p><b>ACCEPT</b> sex <b>IGNORE</b> skin colour (as stated in Q)</p> <p><b>CREDIT</b> example of a <b>measurable</b> characteristic (e.g. leg length, surface area, height, weight)</p>
1	(a)	(ii)	<p><i>idea of</i></p> <p><b>1</b> no / little , environmental effect for , (named example of) discontinuous variation / example given for discontinuous variation in <b>(i)</b> as ecf ;</p> <p><b>2</b> some / large , environmental effect for , (named example of) continuous variation / example given for continuous variation in <b>(i)</b> as ecf ;</p> <p><b>3</b> gender may be affected by , temperature / atrazine exposure ;</p>	2	<p><b>IGNORE</b> examples of environmental factors</p> <p><b>ACCEPT</b> discontinuous variation is <b>only</b> , genetic / due to alleles present</p> <p><b>Note:</b> A comparative statement (e.g. ' environment has a <u>greater</u> effect on continuous variation') = <b>2 marks</b> (mps 1 &amp; 2) e.g ' no environment effect for discontinuous variation but it does affect continuous variation' = <b>2 marks</b> (mps1 &amp;2)</p>

Question			Expected Answer	Mark	Additional Guidance								
1	(a)	(iii)	<p>1 <i>idea that</i> offspring visibly different from , A / egg donor ;</p> <p>2 to show that the offspring produced were clones ;</p> <p>3 to show / identify , (genetic) parents (of clone) / B and C ;</p>	2 max	<p><b>ACCEPT</b> brown frog for A</p> <p>2 'to show that cloning is successful' is <b>not</b> enough</p> <p><b>Note:</b> 'To show that the offspring were clones as they are not the same as A.' = <b>2 marks</b> (mps 1 &amp; 2)</p>								
1	(b)	(i)	<table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th>Genetic fingerprint number</th> <th>Letter of frog</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">D</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">A</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">B</td> </tr> </tbody> </table> <p style="text-align: right;">; ; ;</p>	Genetic fingerprint number	Letter of frog	1	D	2	A	3	B	3	<p><b>Mark the first answer in each box.</b> If an additional answer is given that is incorrect or contradicts the correct answer, then = <b>0 marks</b></p> <p><b>If no letters in the table <u>at all</u>,</b> look at the diagram and award marks if the profiles are identified correctly.</p>
Genetic fingerprint number	Letter of frog												
1	D												
2	A												
3	B												
1	(b)	(ii)	<p>cytoplasm / mitochondria , came from <b>A</b></p> <p><b>or</b></p> <p>mitochondria / (mitochondrial) DNA , in cytoplasm of <b>A</b> ;</p>	1	<p><b>If frog not identified correctly = 0 marks</b></p> <p><b>Must refer specifically to frog A</b></p> <p><b>Must refer specifically to frog A</b></p>								

Question			Expected Answer	Mark	Additional Guidance
1	(c)	(i)	<p><i>advantage</i> (genetically identical so) all react the same <b>or</b> genetic variable controlled ;</p> <p><i>disadvantage</i> expensive (to produce) <b>or</b> don't see varied response to drug like in real populations (of mice)</p> <p><b>or</b> <i>idea that</i> clones (of mice) may have unknown health issue (which would affect responses) ;</p>	2	<p><b>Note that the question refers to the use of cloned or uncloned mice in testing – and NOT to humans.</b></p> <p><b>ACCEPT</b> ora throughout</p> <p><b>IGNORE</b> large numbers of clones produced <b>IGNORE</b> ref to animal welfare / religious objections <b>IGNORE</b> ref to validity</p> <p><b>ACCEPT</b> 'no genetic diversity to affect results'</p> <p><b>ACCEPT</b> 'rare allergies / adverse reactions , won't be seen'</p>

Question			Expected Answer	Mark	Additional Guidance								
1	(c)	(ii)	<p>1 <i>idea to produce</i> , elite / best , animals ;</p> <p>2 <i>idea to save / preserve</i> , endangered animals ;</p> <p>3 grow / produce (spare) , stem cells / tissues / organs ;</p> <p>4 AVP ;</p>	2	<p><b>IGNORE</b> ref research into disease (as given in Q)</p> <p><b>IGNORE</b> ref to cost</p> <p>1 <b>ACCEPT</b> example / desirable characteristics</p> <p>2 <b>ACCEPT</b> recreating extinct animals</p> <p>3 <b>ACCEPT</b> ref to named example of , tissue / organ</p> <p>4 e.g. pet cloning / cloning GM animals / animals for xenotransplantation</p>								
1	(d)		<table border="1"> <thead> <tr> <th>Individuals</th> <th>% of alleles shared</th> </tr> </thead> <tbody> <tr> <td>David and John</td> <td>100 ;</td> </tr> <tr> <td>Anne and Lisa</td> <td>50 ;</td> </tr> <tr> <td>Sarah and Lisa</td> <td>50 ;</td> </tr> </tbody> </table>	Individuals	% of alleles shared	David and John	100 ;	Anne and Lisa	50 ;	Sarah and Lisa	50 ;	3	<p><b>Mark the first answer in each box.</b> If an additional answer is given that is incorrect or contradicts the correct answer, then = <b>0 marks</b></p>
Individuals	% of alleles shared												
David and John	100 ;												
Anne and Lisa	50 ;												
Sarah and Lisa	50 ;												
			<b>Total</b>	<b>17</b>									

Question		Expected Answer	Mark	Additional Guidance
2	(a)	(belong to the) same <u>genus</u> ;	1	
2	(b) (i)	<p>1 not much / little / some , competition / niche overlap ;</p> <p><i>reasons for little competition</i></p> <p>2 use / feed on , different sized flowers / different depth of flowers ;</p> <p>3 vary in proportions of pollen <u>and</u> nectar they collect ;</p> <p>4 fly / live / active / feed / visit flowers , at different times ;</p> <p><i>reason for competition</i></p> <p>5 <i>idea that</i> fly / live / active / feed / visit flowers , overlaps there must be competition ;</p> <p>6 AVP ;</p>	4 max	<p><b>This mark is for a stand alone statement</b> <b>DO NOT CREDIT no</b> competition <b>IGNORE</b> competition unqualified / inter / intra</p> <p>2 <b>CREDIT</b> correct comparative description or use of data e.g. <i>B. pratorum</i> feed on , bigger / longer / deeper , flowers <b>or</b> <i>B. pratorum</i> 7.4(mm) <u>and</u> <i>B. terrestris</i> 6.3(mm)</p> <p>3 <b>CREDIT</b> correct description e.g. <i>B. pratorum</i> mostly pollen and nectar <u>and</u> <i>B. terrestris</i> mostly nectar only <b>or</b> comparison of 2 species using table data <b>IGNORE</b> 'different amounts' of pollen and nectar</p> <p>4 <b>CREDIT</b> correct description of difference e.g. <i>B. pratorum</i> peak in June <u>and</u> <i>B. terrestris</i> in July <b>or</b> <i>B. pratorum</i> appear in earlier in the year <b>or</b> comparison of 2 species using graph data</p> <p>5 <b>CREDIT</b> correct description from data e.g. both compete for food between May and September / both collect pollen only from same % flowers</p> <p>6 e.g. use / feed on , different <u>species</u> of flowers</p>

Question			Expected Answer	Mark	Additional Guidance
2	(b)	(ii)	<p>1 <i>idea of isolation / isolating mechanism / barrier ;</i></p> <p>2 seasonal (difference) / temporal (difference) / males and queens (in different populations) produced in different months / breeding (in different populations) in different months ;</p> <p>3 behavioural (difference) / visit different (types of) flowers / feed at different times / feed on different food types ;</p> <p>4 different flower locations / different (micro)habitats ;</p> <p>5 <i>idea that gene flow restricted / no gene flow (between populations) ;</i></p> <p>6 different adaptations / specialisation / niche partitioning ;</p>	3 max	<p>2 <b>CREDIT</b> example of seasonal / temporal (e.g. <i>B. pratorum</i> has its peak number of workers in June and <i>B. terrestris</i> in July)</p> <p>3 <b>CREDIT</b> 'different mating rituals'</p> <p>5 <b>must refer to gene /allele</b></p> <p>6 <b>IGNORE</b> speciation (as implied in Q) - can be mistaken for specialisation</p>

Question			Expected Answer	Mark	Additional Guidance						
2	(c)	(i)	<table border="1"> <thead> <tr> <th>Observation</th> <th>Type of behaviour</th> </tr> </thead> <tbody> <tr> <td>The time taken for a worker bee to collect food from a flower decreases with practice.</td> <td>learned (behaviour) / learning / operant conditioning / trial and error ;</td> </tr> <tr> <td>All bumble bees start at the bottom of a vertical spike of flowers and work upwards.</td> <td>innate / instinctive ;</td> </tr> </tbody> </table>	Observation	Type of behaviour	The time taken for a worker bee to collect food from a flower decreases with practice.	learned (behaviour) / learning / operant conditioning / trial and error ;	All bumble bees start at the bottom of a vertical spike of flowers and work upwards.	innate / instinctive ;	2	<p><b>Mark the first answer in each box.</b> If an additional answer is given that is incorrect or contradicts the correct answer, then = <b>0 marks</b></p> <p><b>ACCEPT</b> taxis / example of taxis eg chemotaxis  <b>IGNORE</b> inherited / genetically determined  <b>DO NOT CREDIT</b> kinesis</p>
Observation	Type of behaviour										
The time taken for a worker bee to collect food from a flower decreases with practice.	learned (behaviour) / learning / operant conditioning / trial and error ;										
All bumble bees start at the bottom of a vertical spike of flowers and work upwards.	innate / instinctive ;										
2	(c)	(ii)	<p><i>Idea that better / more efficient , at , finding / getting , food ;</i></p> <p>AVP ;</p>	1 max	<p><b>ACCEPT</b> more food can be collected  less , time / energy , spent looking for food  easier to find food  e.g. ref to reduces competition from other colonies</p>						
2	(d)	(i)	reverse transcriptase ;	1	<p><b>Mark the first answer.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b></p> <p><b>DO NOT CREDIT</b> DNA (reverse) transcriptase</p>						

Question			Expected Answer	Mark	Additional Guidance
2	(d)	(ii)	<p>1 <u>mRNA</u> binds to , (gene) probes / cDNA / ssDNA , by complementary base pairing ;</p> <p>2 <i>idea that the <b>more</b> active the gene the <b>more</b> mRNA produced ;</i></p> <p>3 during transcription ;</p> <p>4 <b>more</b> fluorescence indicates <b>more</b> mRNA (bound) ;</p>	3 max	<p>1 <b>DO NOT CREDIT</b> in the context of the gene probe binding to DNA</p> <p>3 <b>IGNORE</b> translation</p>
2	(d)	(iii)	<p>1 dopamine linked to , ADHD / addiction / risk-taking / adventurous behaviour / hyperactivity / erratic behaviour (in humans) ;</p> <p>2 <i>idea of common mechanism in bees and humans (for adventurous behaviour) ;</i></p> <p>3 <i>idea that as they are different organisms the mechanisms may not be comparable (even though apparently similar) ;</i></p> <p>4 AVP ;</p>	3 max	<p>1 <b>IGNORE</b> ref to schizophrenia / Parkinson's <b>This mark is for the effect of the <i>chemical</i> dopamine, not the dopamine receptors alone.</b></p> <p>2 e.g. <b>both</b> have , DRD4 / dopamine receptors e.g. dopamine has the same effect in <b>both</b></p> <p>4 e.g. other genes also involved in , bee / human , behaviour</p> <p><b>Note:</b> 'both have dopamine receptors which are linked to adventurous behaviour' = <b>1 mark</b> (mp 2 only) 'both have dopamine receptors and dopamine is linked to adventurous behaviour' = <b>2 marks</b> (mps 2 &amp; 1)</p>
			<b>Total</b>	<b>18</b>	

Question			Expected Answer	Mark	Additional Guidance
3	(a)	(i)	<p><i>seedlings / coleoptiles have same</i></p> <p><b>S1</b> age ;  <b>S2</b> height / length ;  <b>S3</b> mass ;  <b>S4</b> genotype / genome ;</p> <p><b>S5</b> species ;</p> <p><i>procedure has same</i></p> <p><b>P1</b> same volume of solution applied ;</p> <p><b>P2</b> (named) feature of growth medium ;</p> <p><b>P3</b> watering regime ;</p> <p><b>P4</b> light , intensity / wavelength / duration ;</p> <p><b>P5</b> temperature ;</p>	3 max	<p><b>Mark the first answer on each prompt line.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b></p> <p><b>S2 IGNORE</b> size / surface area / width  <b>S3 IGNORE</b> size / weight  <b>S4 ACCEPT</b> same genetic makeup  <b>IGNORE</b> same genes</p> <p><b>For all P points IGNORE</b> light <i>direction</i>  (as this is an independent variable)</p> <p><b>P1 IGNORE</b> ref to concentration of solution  <b>ACCEPT</b> <i>idea of consistency</i> in application  of <b>J</b> and <b>K</b></p> <p><b>P2</b> e.g. type / pH / fertiliser (applied) / minerals / ions  <b>IGNORE</b> nutrients</p> <p><b>P3</b> e.g. volume of water / time of watering</p> <p><b>P4</b> e.g. distance from light source</p>

Question			Expected Answer	Mark	Additional Guidance
3	(a)	(ii)	<i>idea that shows the response without treatment</i>  <i>or</i>  <i>idea that allows the , effect of the treatment / results / groups , to be , compared ;</i>	1	<b>IGNORE</b> improves validity / fair test (as an explanation is required) ‘to show the effects of J and K’ is not enough  <b>CREDIT</b> ‘observations’ for treatments
3	(a)	(iii)	<b>ONLY CREDIT mark points in context of results, and not in context of general roles of auxin and gibberellin</b>  <i>J is auxin because</i> <b>A1</b> inhibition of development of (lateral) buds (in group 2) ; <b>A2</b> <u>growth</u> of , coleoptiles / group 5 , towards light ;  <i>K is gibberellin because</i> <b>G1</b> greater increase in , height / stem length (in group 3) ; <b>G2</b> causes growth of (lateral) buds (in group 3) ;	3 max	<b>J must be identified correctly for A marks to be awarded</b> <b>K must be identified correctly for G marks to be awarded</b>  <b>A1 CREDIT</b> ( group2) results show apical dominance <b>A2 CREDIT</b> ( group 5) results show positive phototropism <b>IGNORE</b> plant (as all are plants)  <b>G1 CREDIT</b> greater elongation <b>G2 CREDIT</b> (group 3) results do not show apical dominance
3	(b)	(i)	protein ;	1	<b>ACCEPT</b> glycoprotein <b>IGNORE</b> polypeptide / channel / carrier / transport
3	(b)	(ii)	(synaptic) <u>cleft</u> ;	1	<b>IGNORE</b> gap <b>IGNORE</b> neuromuscular
3	(b)	(iii)	acetylcholine esterase / ACh esterase ;	1	<b>ACCEPT</b> phonetic spelling and ignore upper/lower case <b>IGNORE</b> AChE

Question		Expected Answer	Mark	Additional Guidance
3	(c)	<p>mitochondria ;</p> <p>oxidative phosphorylation ;</p> <p>lactate ;</p> <p>creatine phosphate / phosphocreatine ;</p> <p>(cross-)bridge / (cross-)link ;</p> <p>myosin (head) ;</p>	6	<p><b>Mark the first answer on each prompt line.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b></p> <p><b>ACCEPT</b> mitochondrion <b>DO NOT CREDIT</b> mitochondrial matrix</p> <p><b>IGNORE</b> electron transport chain (as not a stage)</p> <p><b>ACCEPT</b> lactic acid</p> <p><b>DO NOT CREDIT</b> creatinine</p> <p><b>DO NOT CREDIT</b> bond <b>ACCEPT</b> phonetic spelling</p>
<b>Total</b>			<b>16</b>	

Question			Expected Answer	Mark	Additional Guidance
4	(a)	(i)	3 ;	1	<b>IGNORE</b> triplet
4	(a)	(ii)	4 <sup>3</sup> or 4 x 4 x 4 or 4 x 4 <sup>2</sup> ;	1	
4	(a)	(iii)	Several, triplet(s) / codon(s) , code for one amino acid ;  (some are used as) start / stop / termination ;  <i>idea that</i> mutation may , not result in change in amino acid / have a neutral effect / result in silent mutation ;	2 max	<b>Must be clear that base combination is a group of 3 bases</b>  <b>IGNORE</b> degenerate <b>DO NOT CREDIT</b> makes/ produces/ creates , amino acids  <b>DO NOT CREDIT</b> deletion / insertion (as would create frame shift)
4	(a)	(iv)	adenine / A <b>and</b> cytosine / C <b>and</b> guanine / G ;	1	<b>Mark the first 3 answers.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b>  <b>DO NOT CREDIT</b> adenosine  <b>DO NOT CREDIT</b> cysteine  <b>DO NOT CREDIT</b> glycine

Question		Expected Answer	Mark	Additional Guidance
4	(b)	<p><i>transcription</i></p> <p>1 DNA / gene , copied / transcribed , into mRNA ;</p> <p>2 free / activated , (RNA) nucleotides / (RNA) nucleoside triphosphates ;</p> <p>3 (line up by) complementary base-pairing / described ;</p> <p>4 (to) one / template / reference / sense , (DNA) strand ;</p> <p>5 (catalysed by) RNA polymerase ;</p> <p><i>translation</i></p> <p>6 (mRNA moves to) ribosomes ;</p> <p>7 tRNA (molecules) bind to mRNA ;</p> <p>8 <u>anticodon</u>(s) , match / pair with / bind to , codons ;</p> <p>9 specific / correct , amino acid attached to tRNA ;</p> <p>10 formation of <u>peptide</u> bond between amino acids;</p>	6 max	<p><b>Marks may be awarded from an annotated diagram</b></p> <p>1 <b>IGNORE</b> 'used to make'</p> <p>2 <b>DO NOT CREDIT</b> DNA nucleotides</p> <p>3 <b>CREDIT</b> 'A-T, C-G and A - U'</p> <p>4 <b>ACCEPT</b> 'non-coding' for 'template'</p> <p>5 <b>DO NOT CREDIT</b> in context of breaking H bonds</p> <p>6 <b>CREDIT</b> translation occurs at ribosomes <b>Note:</b> tRNA anticodons bind to mRNA codons <b>= 2 marks</b> (mps 7 &amp; 8)</p> <p>10 <b>DO NOT CREDIT</b> dipeptide / polypeptide , bond</p>
		QWC ;		1
<b>Total</b>			<b>12</b>	

Question			Expected Answer	Mark	Additional Guidance										
5	(a)	(i)	<p>1 lag phase / slow increase (in , population / number / percentage) , at start / initially / day 0 - 1 / during day 1 ;</p> <p>2 log phase / exponential increase / rapid increase , day 1 - 3 ;</p> <p>3 <u>rate of increase</u> , slows / less steep , days 3 - 4 / during day 3 ;</p> <p>4 stationary phase / population levels off / population stays at 100% , at end / finally / remaining days / days 4 - 6 ;</p> <p>5 comparative figures quoted with 2 x-y readings ;</p>		<p><b>IGNORE</b> explanations <b>ACCEPT</b> 'the population grows' or 'it grows' (rather than increase) <b>DO NOT CREDIT</b> 'yeast grow(s)'</p> <p>1 <b>ACCEPT</b> days 0 - 0.9 <b>ACCEPT</b> lasts 1 day</p> <p>2 <b>ACCEPT</b> days 0.9 - 3.5</p> <p>3 <b>ACCEPT</b> days 3.3 - 3.6</p> <p>4 <b>ACCEPT</b> after day 3.5 - 4</p> <p>5 Each unit must be quoted at least once</p> <table border="1" data-bbox="1406 938 1957 1149"> <thead> <tr> <th>Time (days)</th> <th>Yeast (% final population)</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>24</td> </tr> <tr> <td>1</td> <td>32</td> </tr> <tr> <td>3</td> <td>90</td> </tr> <tr> <td>3.5 - 6</td> <td>100</td> </tr> </tbody> </table> <p>Take care to distinguish between an increase in percentage (by either quoting the figures for the days or by calculating the difference) and a <i>percentage increase</i>.</p>	Time (days)	Yeast (% final population)	0	24	1	32	3	90	3.5 - 6	100

Explanation	Letter															
One gene with two alleles. The alleles show codominance.	A ;															
One gene with two alleles, located on an autosome (gene not sex linked). One allele is dominant and the other is recessive.	E ;															
Two genes for two different characteristics on two different chromosomes.	D ;															
A sex linked gene with a dominant and a recessive allele.	B ;															
Epistasis, where two genes interact to affect one phenotypic character.	C ;															

Question			Expected Answer	Mark	Additional Guidance
6	(b)	(i)	$q^2 = 15 \div 60$ or 0.25 ; $q = \sqrt{0.25}$ or 0.5 ; (p =) 0.5 ;	3	<p><b>Correct answer (0.5) = 3 marks</b> even if no working shown</p> <p><b>No mark for incorrect <math>q^2</math> value but apply ecf afterwards</b></p> <p><b>ALLOW</b> ecf from candidates <math>q^2</math> value (likely to be 0.87 or 0.9 (if candidate's <math>q^2 = 0.75</math>))</p> <p><b>ALLOW</b> ecf for p from candidate's calculated q value, (if q value between 0 and 1)</p> <p><b>IGNORE</b> % values given for p ( e.g. 50 % for 0.5 )</p>
6	(b)	(ii)	<p><i>in the pet shop</i></p> <ol style="list-style-type: none"> <li>1 population is , small / not (sufficiently) large ;</li> <li>2 not all members of the population are breeding ;</li> <li>3 <i>idea that</i> mating is not random ;</li> <li>4 <i>idea that</i> migration / emigration / immigration , is occurring ;</li> <li>5 <i>idea that</i> the non-brown rabbits could be colours other than white ;</li> </ol>	2	<p><b>IGNORE</b> ref to (natural) selection / mutation (as these do not apply to the 'artificial' population in the pet shop)</p> <p><b>IGNORE</b> 'albinos are infertile'</p>
<b>Total</b>				<b>10</b>	

Question		Expected Answer	Mark	Additional Guidance
7	(a)	<p>1 pioneers arrive , <b>before</b> climax / <b>earlier</b> ; <b>ora</b></p> <p>2 pioneer communities subject to , <b>greater</b> / <b>more</b> , change / succession / replacement ; <b>ora</b></p> <p>3 pioneer community (usually) has , <b>less</b> / <b>lower</b> , biodiversity ; <b>ora</b></p> <p>4 <i>idea that</i> pioneer community is (often) <b>less</b> , stable / self-sustaining ; <b>ora</b></p> <p>5 pioneer community has <b>lower</b> biomass ; <b>ora</b></p> <p>6 AVP ;</p>	2 max	<p><b>Note: All mark points are comparative</b></p> <p>1 <b>CREDIT</b> pioneers arrive first / climax arrive last</p> <p>6 e.g. species in pioneer community better adapted to (named) abiotic factor(s) <b>and</b> those in climax community better adapted to (named) biotic factor(s)</p>

Question		Expected Answer	Mark	Additional Guidance
7	(b)	<p>1 decomposition is break down , dead matter / waste</p> <p><b>or</b></p> <p>decomposition is conversion of <u>organic</u> matter to inorganic ;</p> <p>2 denitrification is conversion of <u>nitrates</u> to nitrogen (gas) ;</p> <p>3 decomposition increases , mineral / <u>nitrate</u> , supply <b>and</b> denitrification reduces , mineral / <u>nitrate</u> , supply ;</p>	2 max	<p>1 <b>IGNORE</b> putrefication</p> <p>1 <b>CREDIT</b> for <b>inorganic</b>: carbon dioxide / CO<sub>2</sub> / water / H<sub>2</sub>O / ammonium compounds / ammonium ions / NH<sub>4</sub><sup>+</sup></p> <p><b>IGNORE</b> ammonia / NH<sub>3</sub></p> <p>2 <b>CREDIT</b> correct formulae (NO<sub>3</sub><sup>-</sup> and N<sub>2</sub>) <b>DO NOT CREDIT</b> nitrogen oxides</p> <p>3 <b>CREDIT</b> decomposition returns , mineral / <u>nitrate</u>, to soil <b>and</b> denitrification removes mineral / <u>nitrate</u>, to soil</p>
7	(c)	<p>1 conservation maintains , ecosystem / biodiversity / species / habitats</p> <p><b>or</b></p> <p>conservation involves , active / sustainable , management of , ecosystem / resource / habitat ;</p> <p>2 preservation leaves , ecosystems / habitats , undisturbed ;</p>	2	<p><b>IGNORE environment for MP1 and 2</b></p> <p><b>ACCEPT</b> named resource</p> <p><b>ACCEPT</b> unchanged/ not disrupted / no physical intervention</p> <p><b>IGNORE</b> ref to preservation in any context other than that of conservation/preservation</p>

Question		Expected Answer	Mark	Additional Guidance
7	(d)	<p><b>1</b> nitrogen fixation is the conversion of (atmospheric) nitrogen into , ammonia / ammonium compounds / ammonium ions ;</p> <p><b>2</b> nitrification is the conversion of , ammonia / ammonium compounds / ammonium ions , into nitrite / nitrate ;</p> <p><b>3</b> correct ref to microorganisms involvement in both processes ;</p>	<p><b>2 max</b></p>	<p><b>1 CREDIT</b> <math>N_2 / NH_3 / NH_4^+</math></p> <p><b>2 CREDIT</b> <math>NH_3 / NH_4^+</math> <b>CREDIT</b> <math>NO_2^- / NO_3^-</math> <b>DO NOT CREDIT</b> nitrate to nitrite</p> <p><b>3</b> e.g. nitrogen fixation involves , <i>Rhizobium</i> / <i>Azotobacter</i> / <i>Nostoc</i> <b>and</b> nitrification involves , <i>Nitrosomonas</i> / <i>Nitrobacter</i></p>
